

# Grand opening of ATA Systems Latin American Division

## ATA Systems LAD is now operational...

ATA Systems Incorporated is proud to announce the creation of the ATA Systems Latin American Division (ATA LAD). We want to extend a warm welcome to our newest partner in South America, Miguel A. Olivia. Miguel has extensive experience in the import/export industry and is a valuable asset to ATA LAD. If anyone requests assistance or further information in the Latin American regions please feel free to contact our office in Paraguay.

## Don't forget about our other products that are ready and available to order...

The **WeaponLock™** combines *fingerprint recognition* with a high-tech weapon securing system. It is regulated by a management software application specially designed for *maximum monitoring ability*. The management software is designed to discharge weapons in accordance to the preprogrammed authorized personnel.

Authorization Programming

Real Time Monitoring Systems

Identifies user and reports unauthorized attempts

The **ATA-Electrified Riot Shield** is a great addition the “disable and capture” product line offered by ATA Systems Incorporated. This cuttin edge riot shield offers a “shocking” 50,000 volt charge activated by a push button system. It is made from a light weight poly-fiber plastic designed to withstand fire and repeated blows commonly experienced in high density riot situations.

The **SmartCase™** is a revolutionary personal and commercial carrying device. This device works by automatically activating upon theft (after a distance of 30 Meters). First, it sounds a 110 Db Siren, followed by an 80,000 volt shock and Then, detonation of color smoke dye to discolor contents (Optional Feature). It requires no buttons to be pushed in the event of a robbery and No recharging of any kind. This product designed for safe transportation of valuable or money and is practical for both commercial and personal use.

We would also like to remind our distributors that without a demo, it will be very difficult to make a sale. We only place demo orders once a month due to expedited air shipping which is normally not standard. Shipping delivery can take up to two weeks, distributors must plan accordingly. For any questions or concerns please don't hesitate to contact ATA Systems Incorporated TEL: 407-895-9491 or visit [www.myatasystems.com](http://www.myatasystems.com)
